

WIRELESS INFRARED BARRIER

BP-WAIR30-4

FEATURES

- Definitely wire-free design, easy to install and operate
- Low voltage consumption, long battery life
- Fully-sealed PC tube adopted, well against dust or water
- IP65 approved
- Low voltage reminding. If turning to 2.9V, low-voltage signal will be sent to alarm host
- 433MHz wireless coding
- Lighting protection design can avoid being struck by lightning

SPECIFICATION

Model: BP-WAIR30-4		
Technical Parameters		
Maximum detection distance	30m	
Beams	4	
Dimensions	39*39*650mm	
Working current	TX	190uA
	RX	110uA
Alarm current	0.3mA	
Battery life	2 years	
Wireless frequency	433MHz	
Interruption period	≤40ms	
Waterproof grade	IP66	
Wireless transmission distance	100m in open area	
Working mode	Interruption all beams or 1.2 beams, 3.4 beams, 5.6 beams, 7.8 beams from up to bottom
